

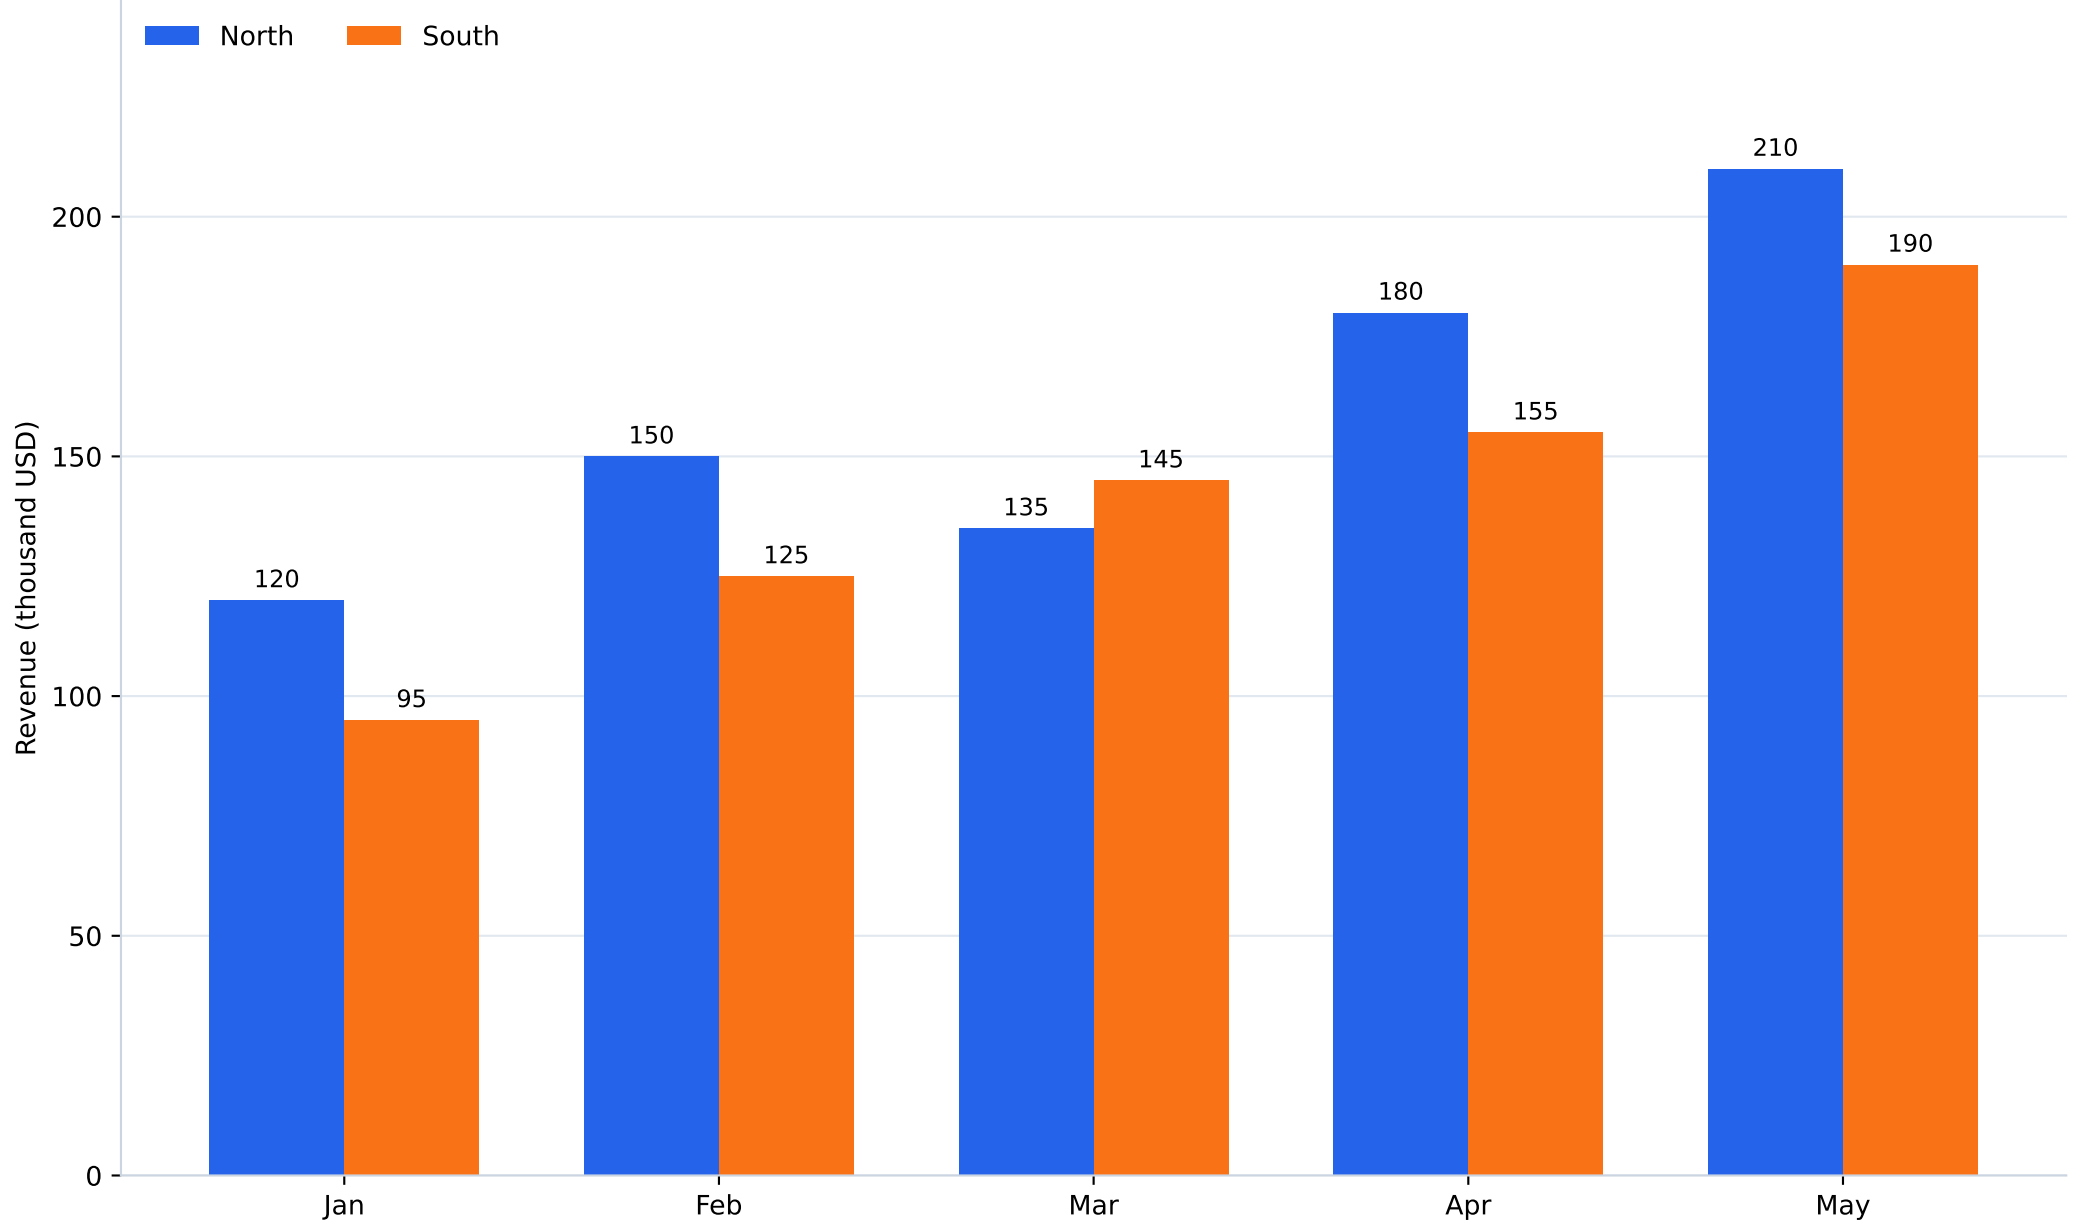

Chart extraction

Deterministic visual test fixture

This PDF contains deliberately labeled charts for comparing Docling classification, VLM observations, formatting, and SQL rows. All source values are printed on the charts and repeated on the final page.

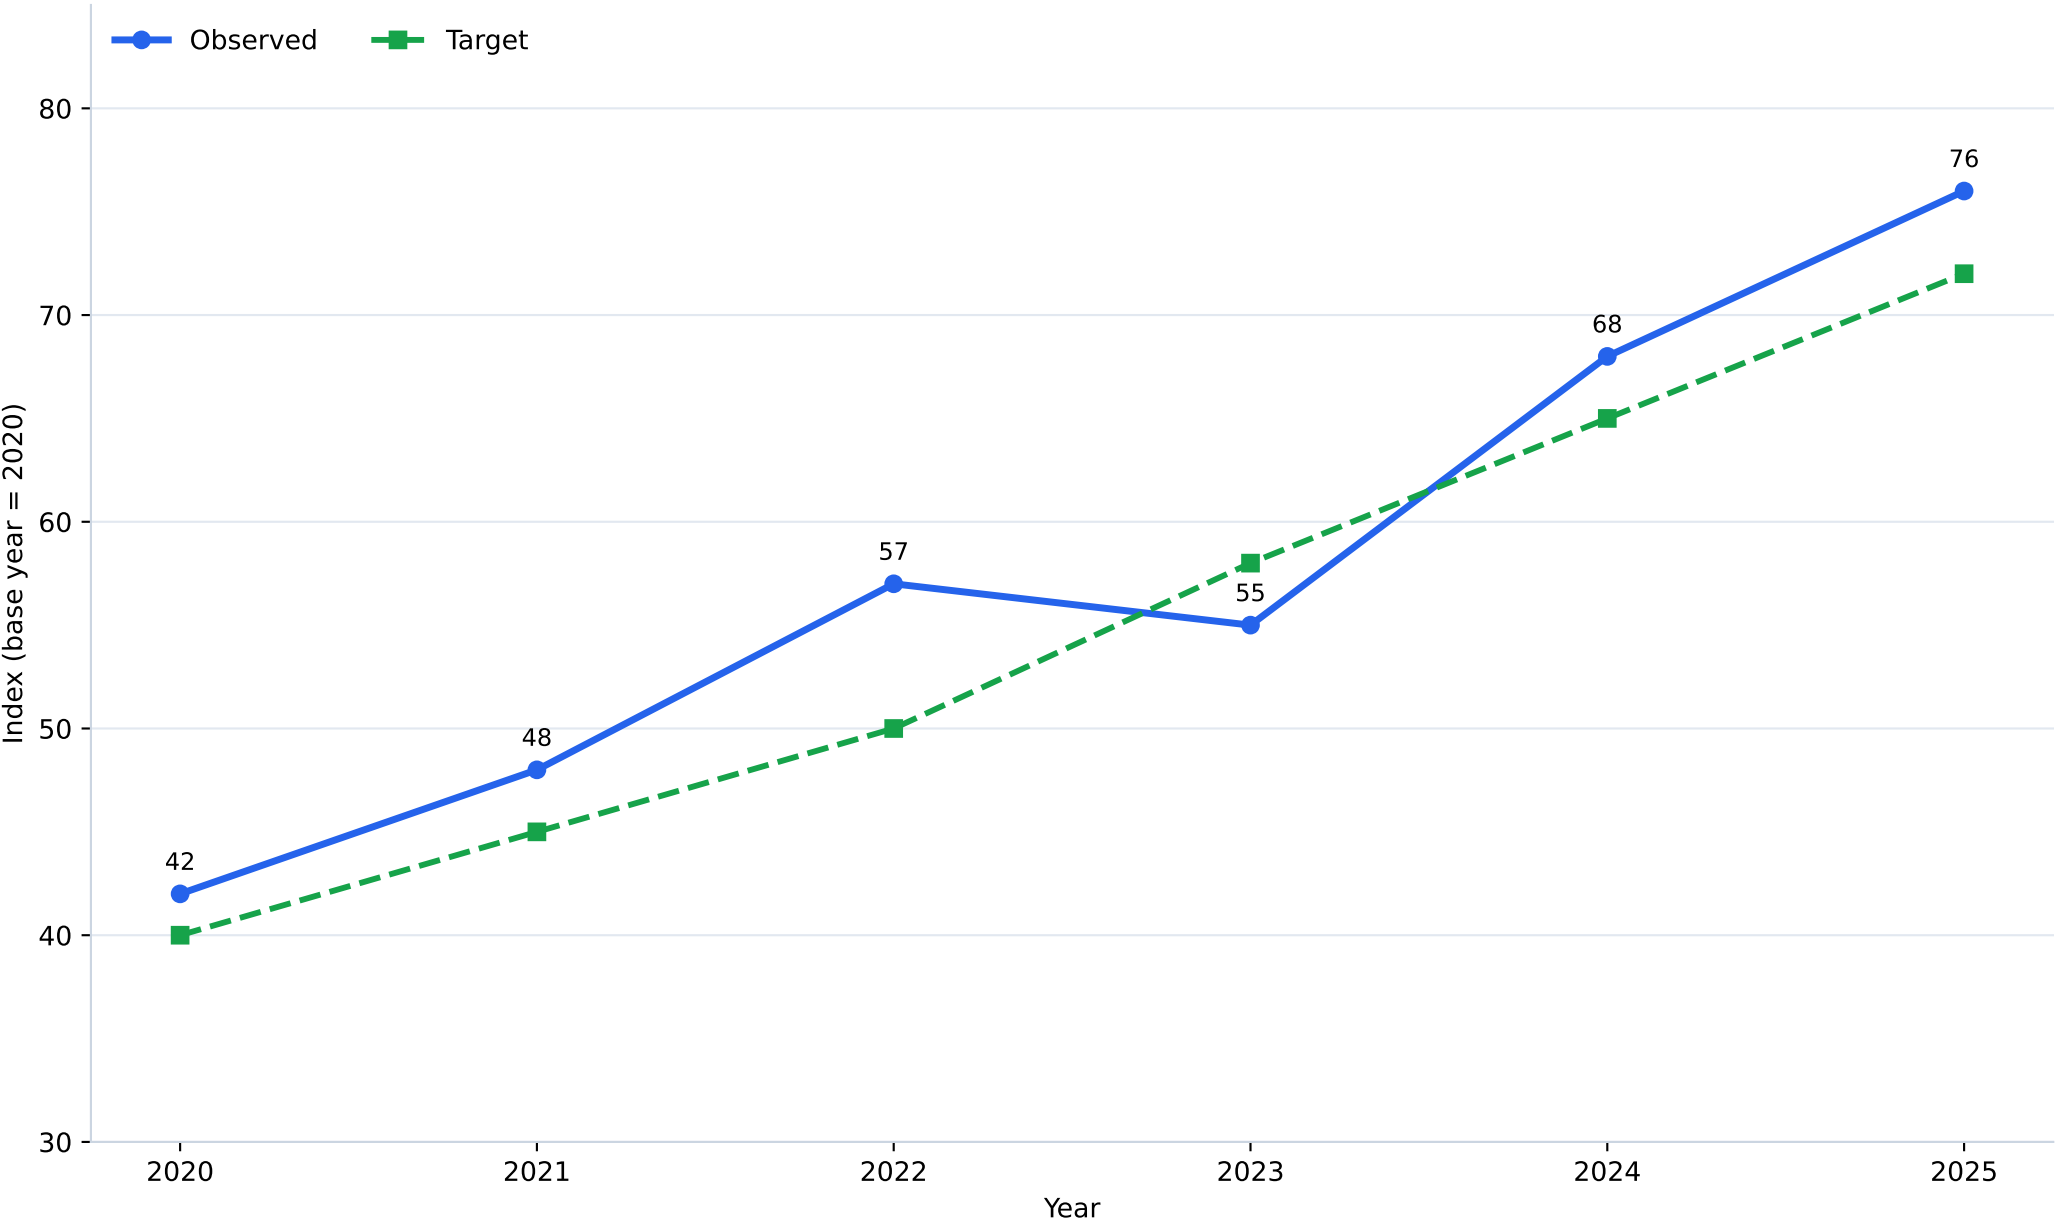

Monthly revenue by region

Grouped bar chart - values are in thousand USD

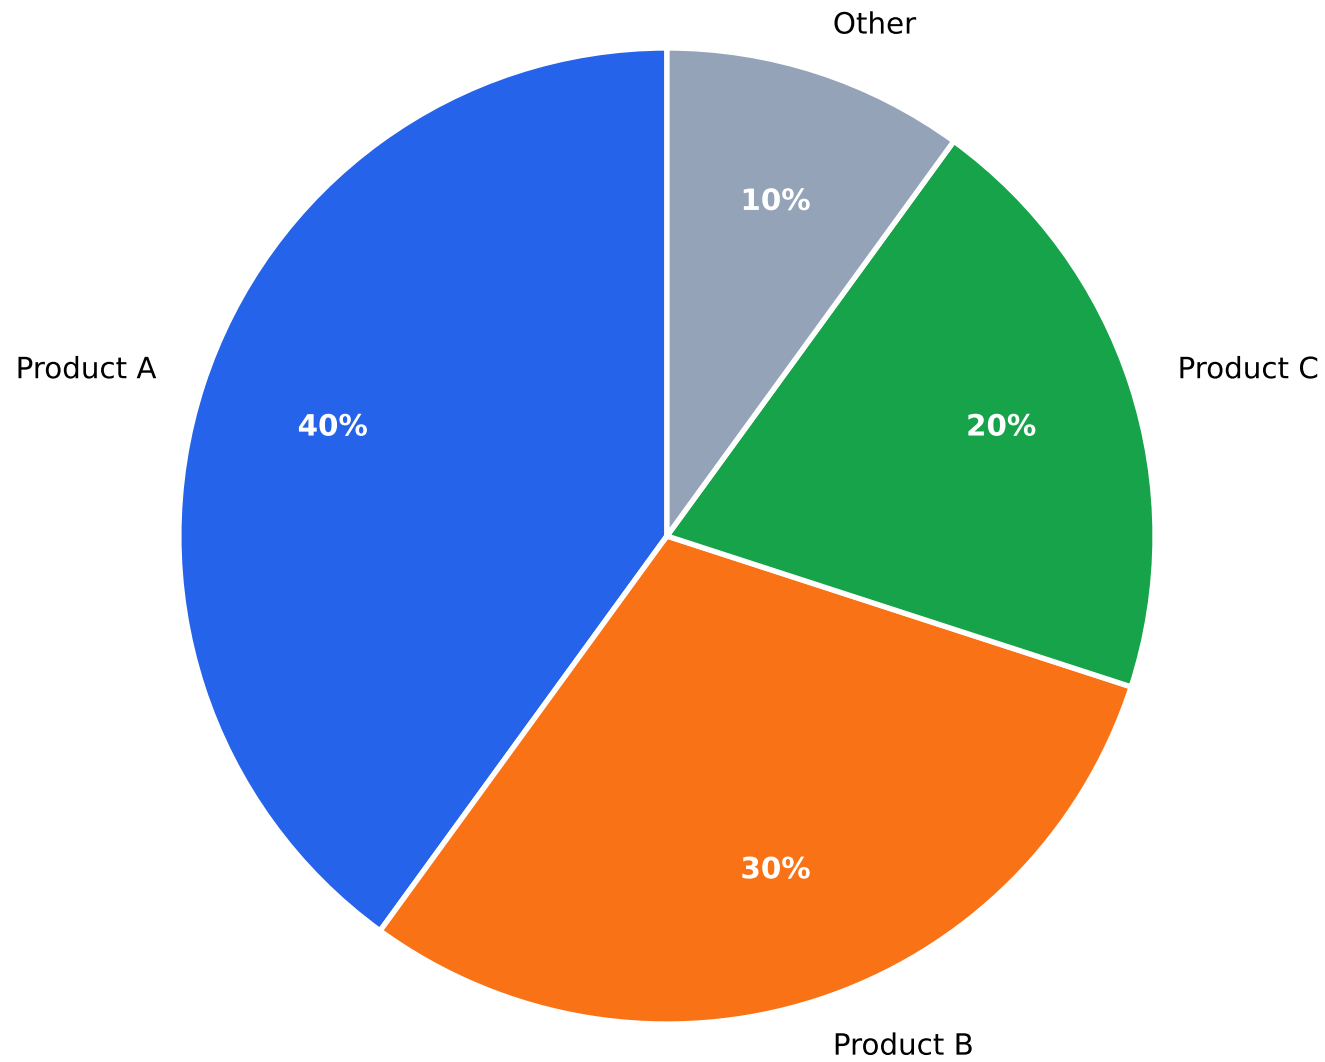

Performance index over time

Line chart - observed values and planned target

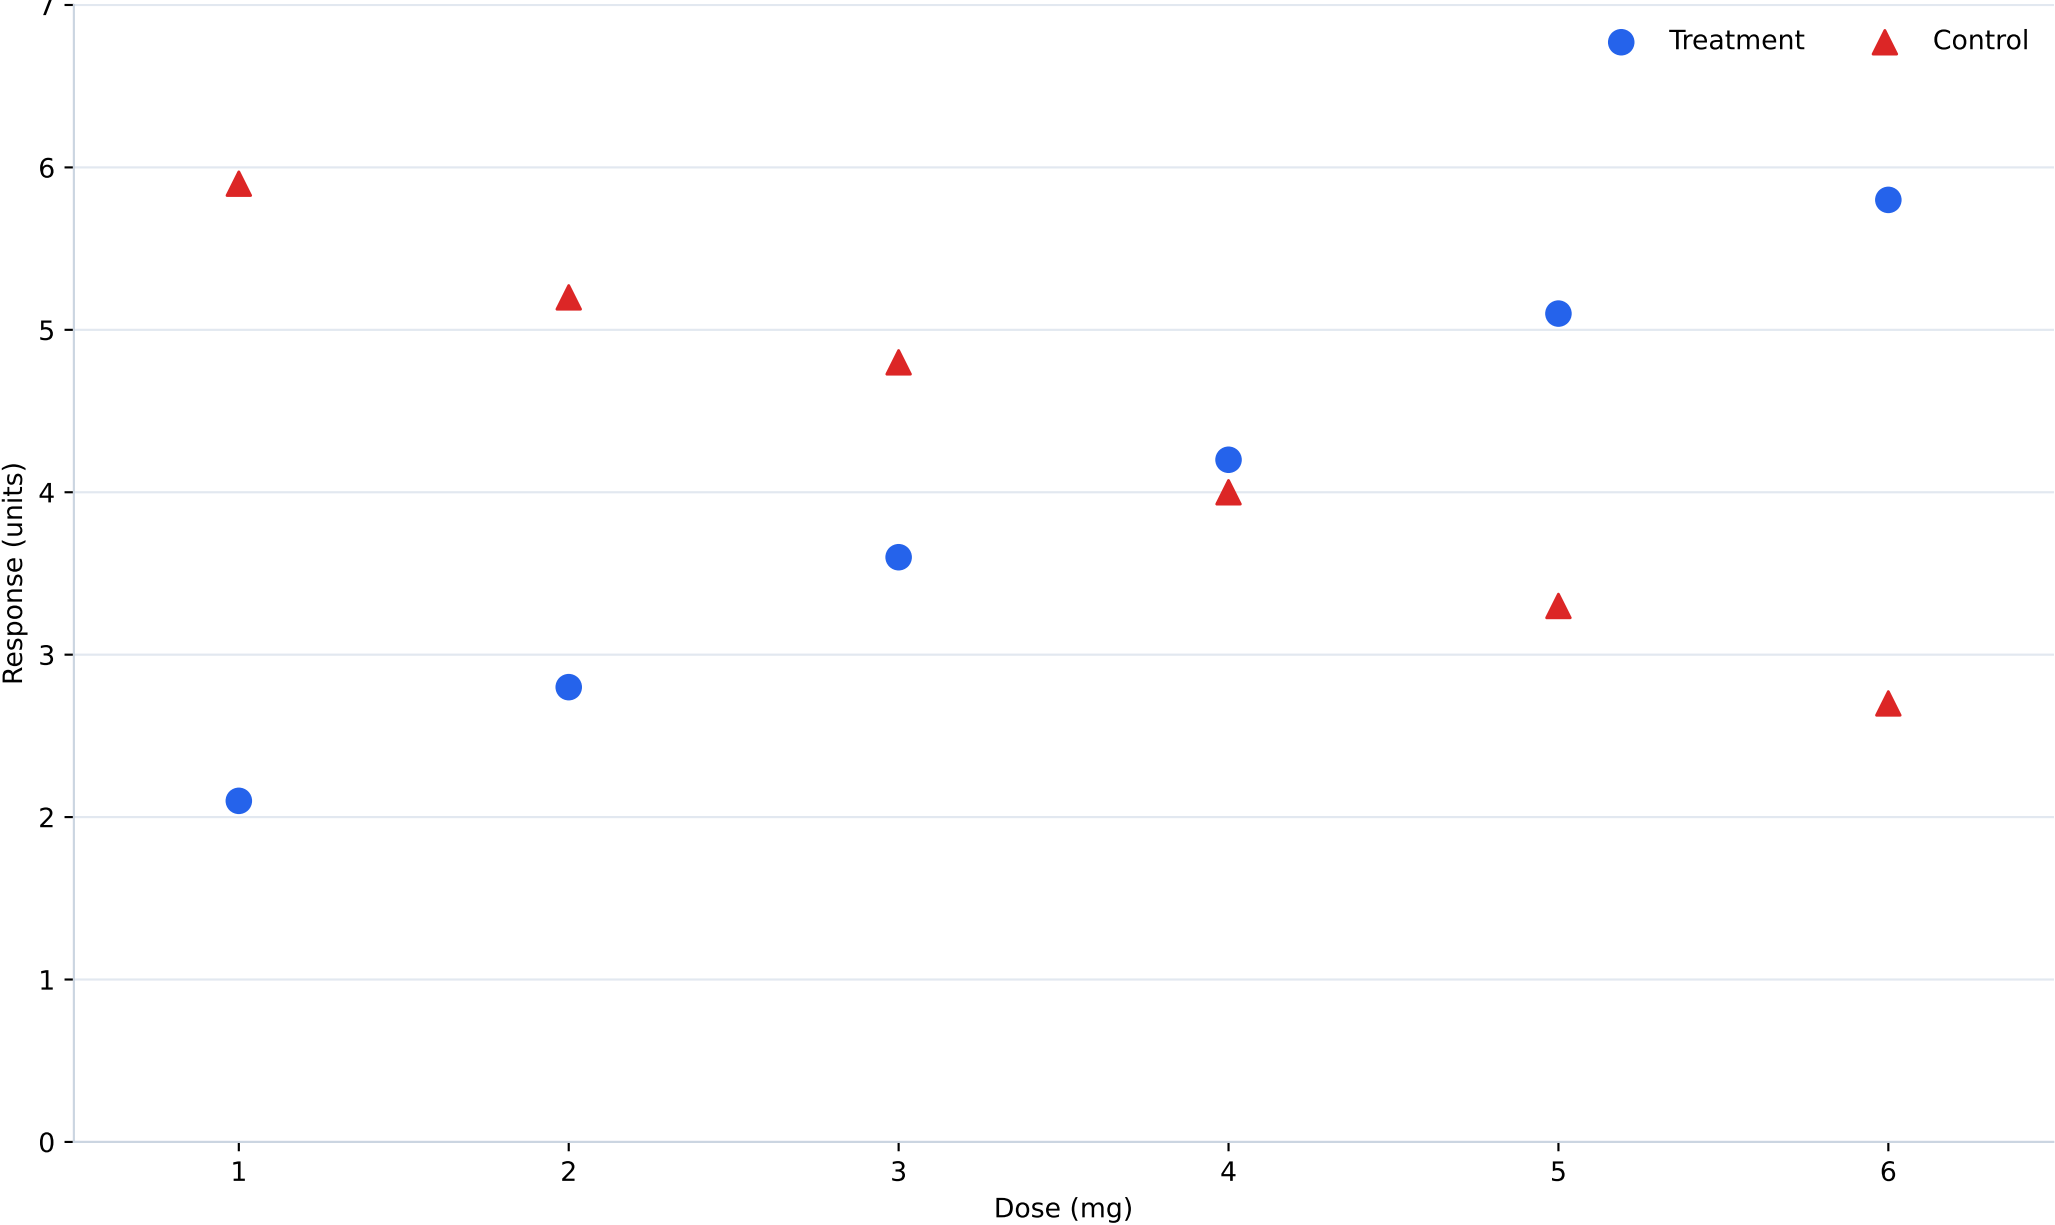

2025 market share

Pie chart - percentages sum to 100%

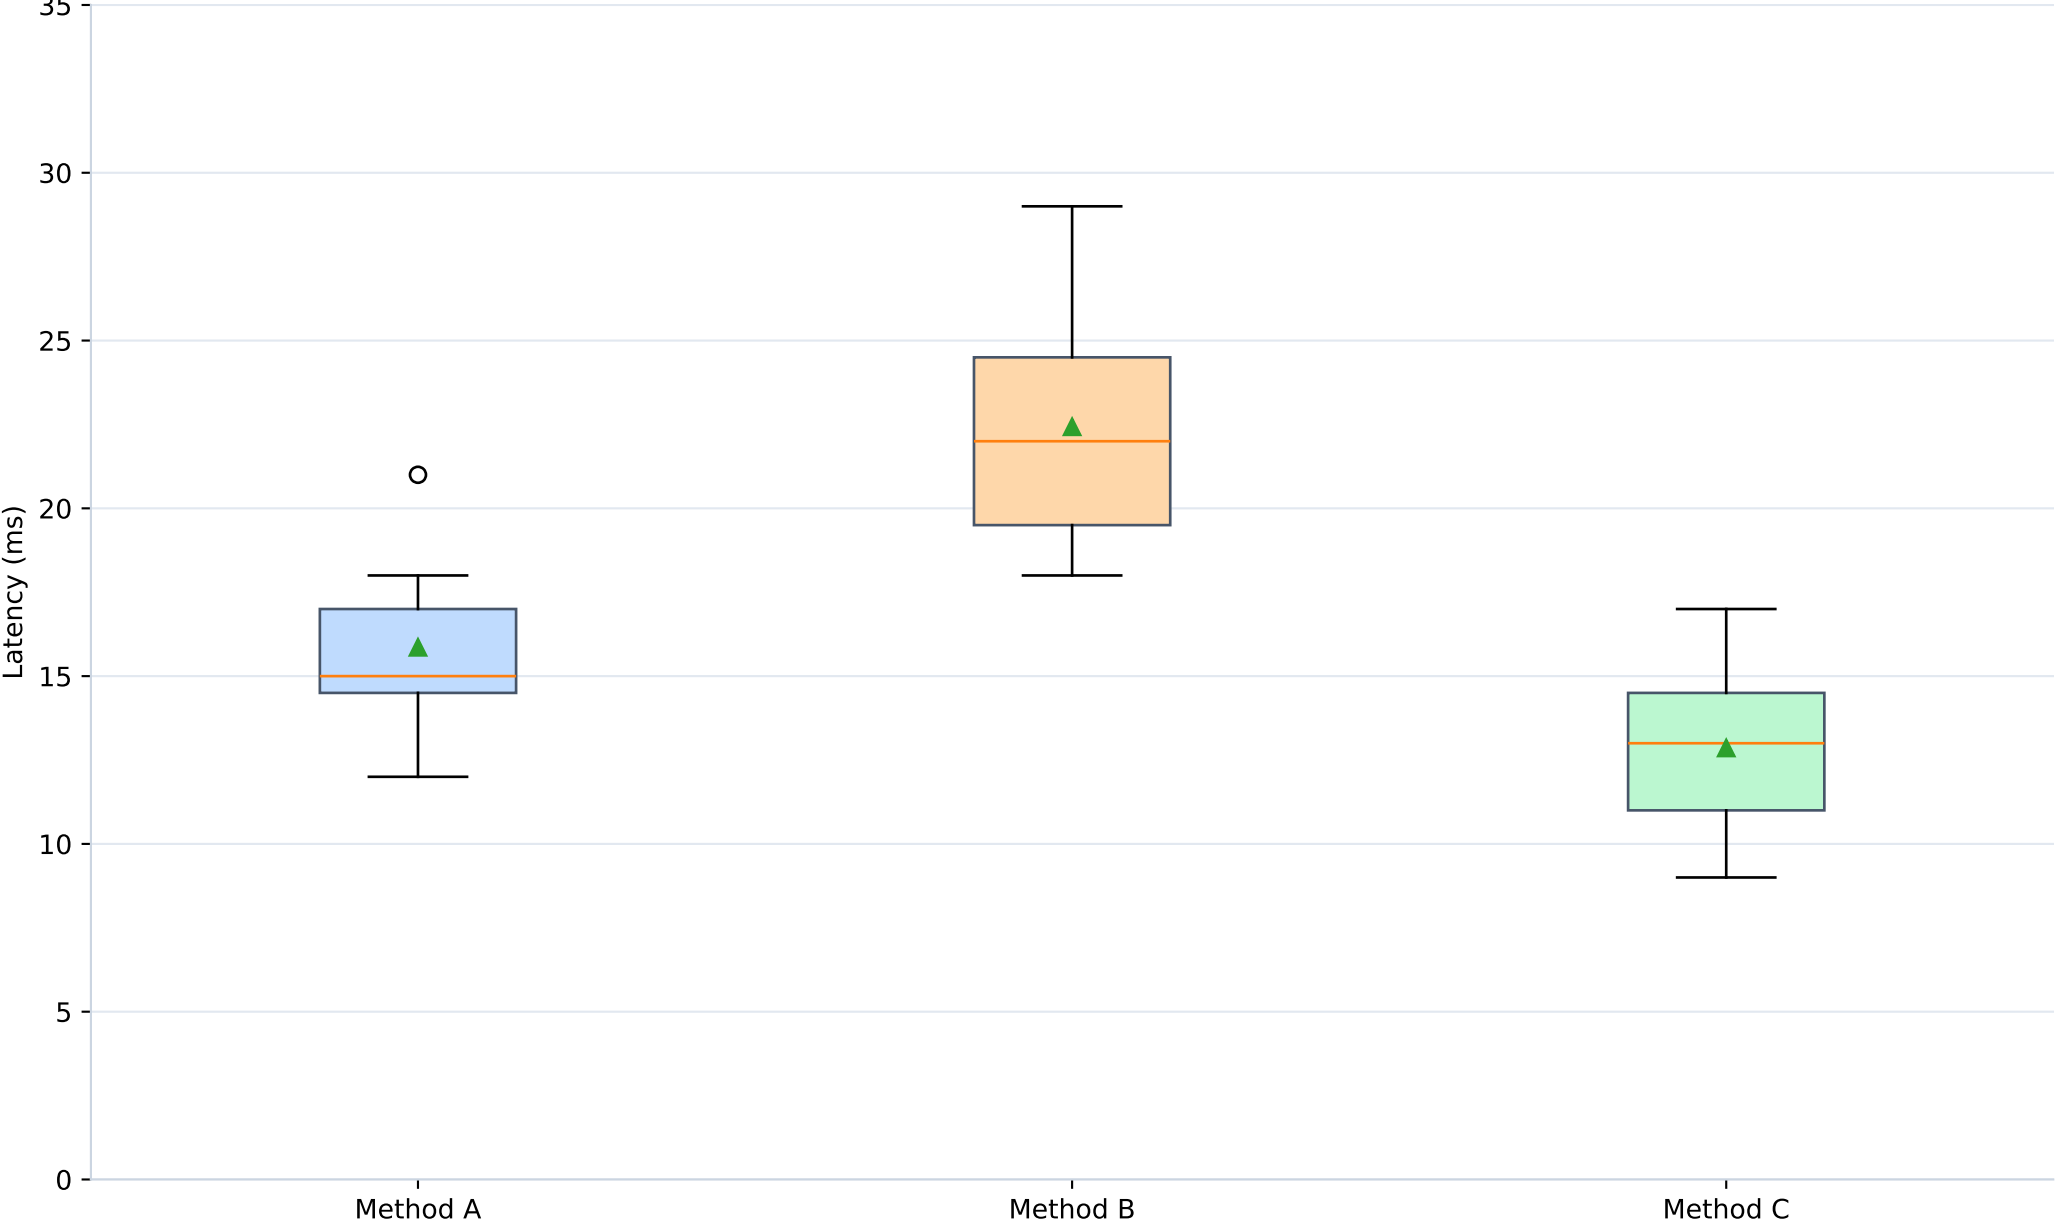

Dose and response

Scatter plot - two labeled cohorts

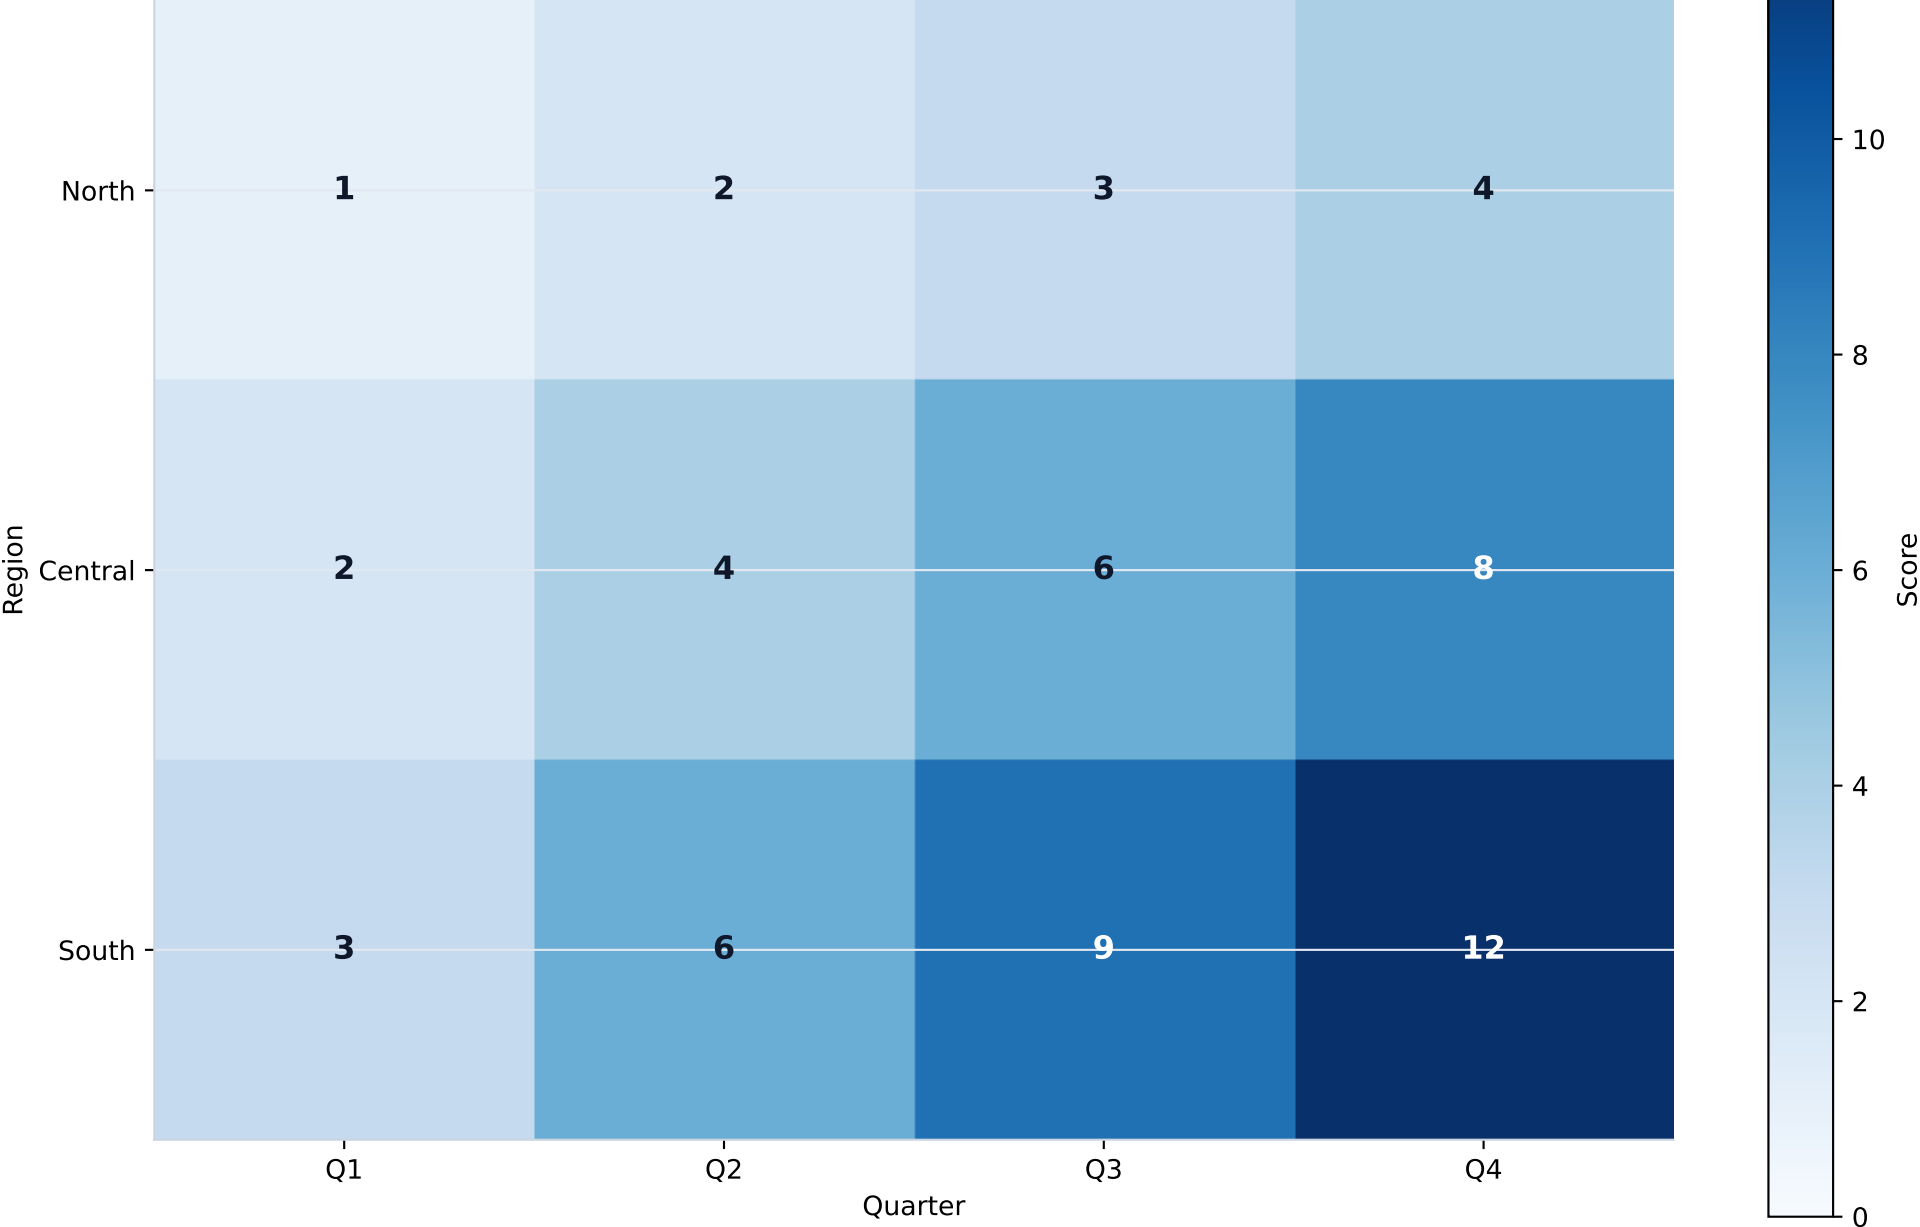

Latency distribution by method

Box plot - mean markers are shown as black triangles

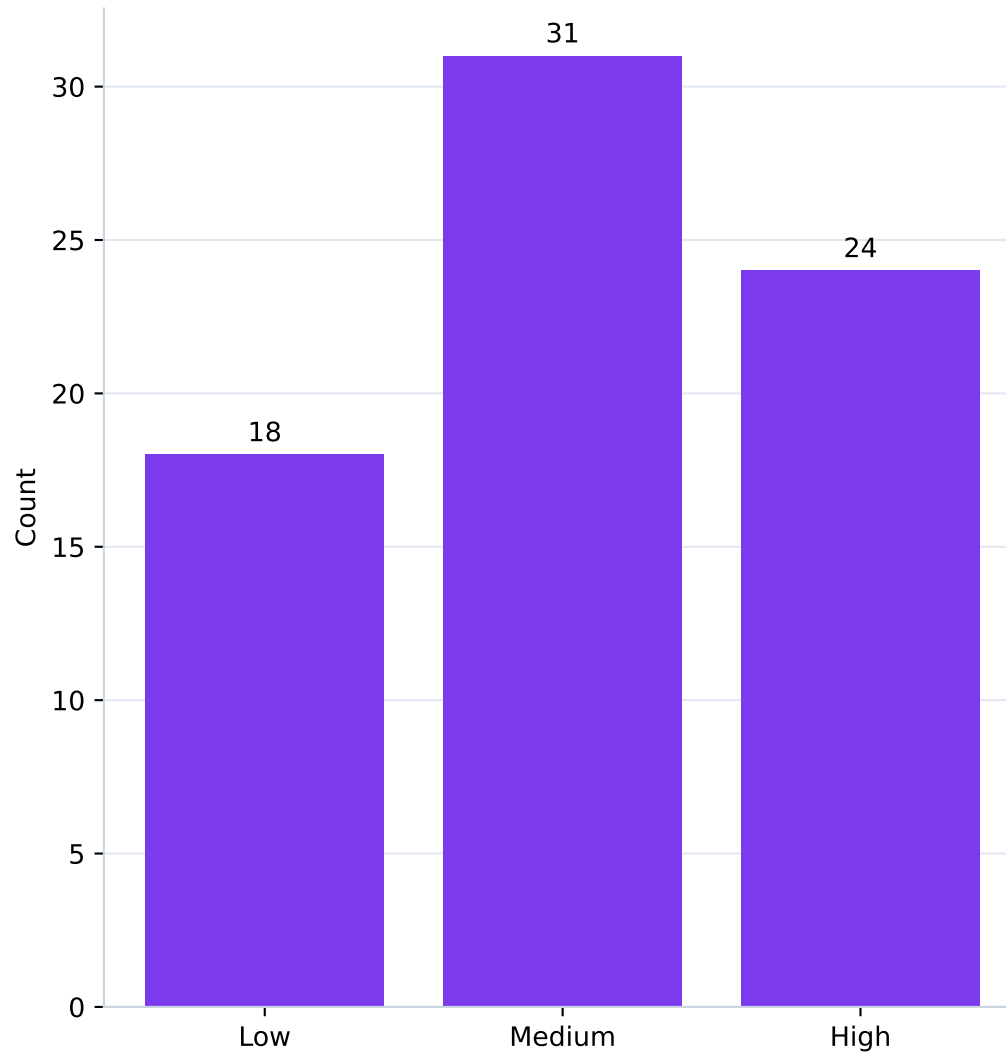

Regional score matrix

Heatmap - integer cell values

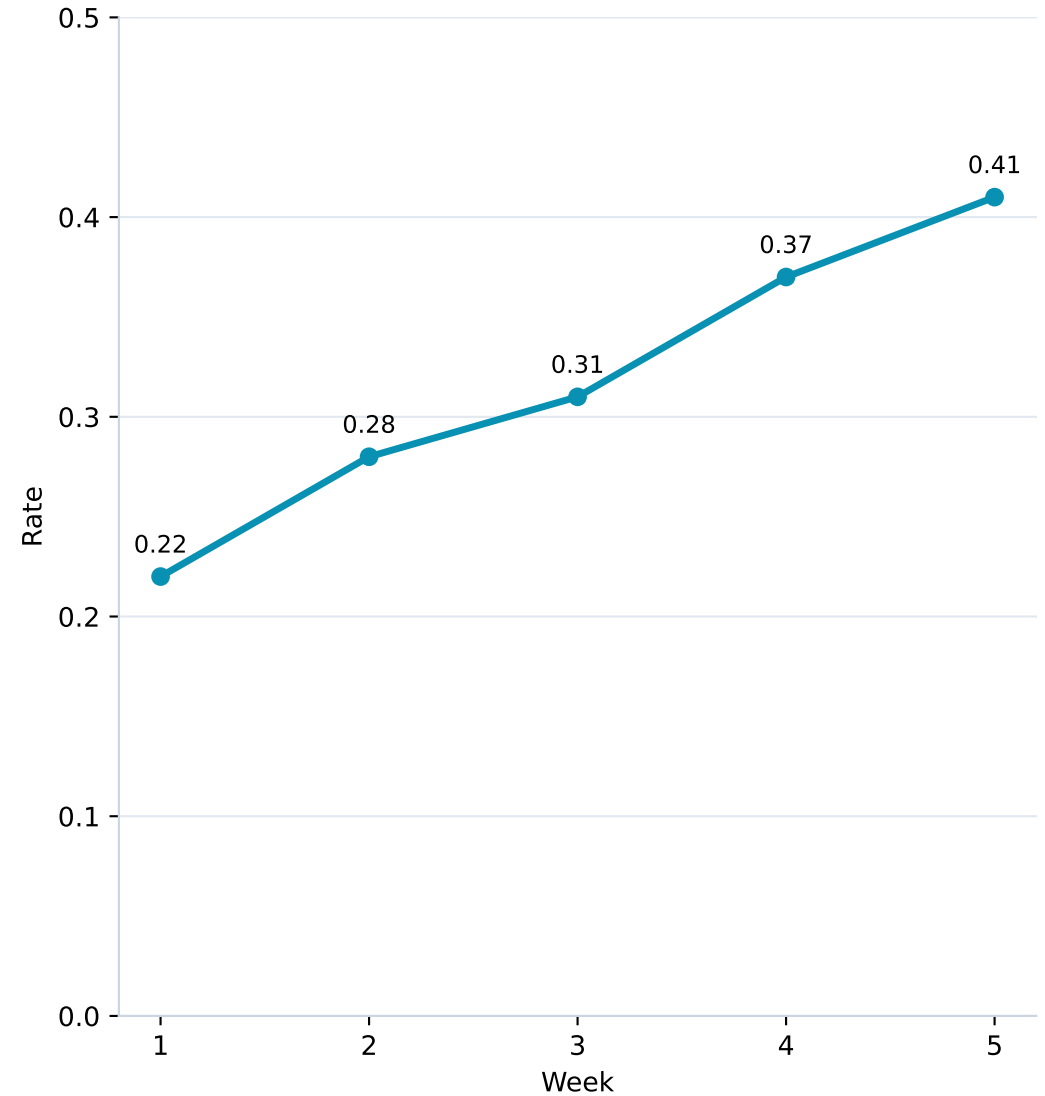

Panel A: category counts

Bar chart

Panel B: weekly rate

Line chart

Ground truth for comparison

Use this page to compare normalized formatter output with the printed chart values.

BAR_CHART	Jan North=120, South=95; Feb North=150, South=125; Mar North=135, South=145; Apr North=180, South=155; May North=210, South=190.
LINE_CHART	Observed: 2020=42, 2021=48, 2022=57, 2023=55, 2024=68, 2025=76. Target: 2020=40, 2021=45, 2022=50, 2023=58, 2024=65, 2025=72.
PIE_CHART	Product A=40%, Product B=30%, Product C=20%, Other=10%.
SCATTER_PLOT	Treatment points: (1,2.1), (2,2.8), (3,3.6), (4,4.2), (5,5.1), (6,5.8). Control points: (1,5.9), (2,5.2), (3,4.8), (4,4.0), (5,3.3), (6,2.7).
BOX_PLOT	Method A samples: 12,14,15,15,16,18,21. Method B: 18,19,20,22,24,25,29. Method C: 9,11,11,13,14,15,17.
HEATMAP	Rows North/Central/South; columns Q1/Q2/Q3/Q4: North=[1,2,3,4], Central=[2,4,6,8], South=[3,6,9,12].
MIXED_PANEL	Panel A counts: Low=18, Medium=31, High=24. Panel B rates: Week 1=0.22, 2=0.28, 3=0.31, 4=0.37, 5=0.41.

No values are implied beyond those printed above. Preserve uncertainty or missing fields as null.
